PROJECT TITLE	Plugging into the Future: An Exploration of Electricity Consumption Patterns
MAX MARKS	1 MARK

CHAPTER – V

PROJECT PLANNING AND SCHEDULING

5.1 – Project Milestones & Tasks

1. Data Collection & Extraction from Database

- Connected the electricity consumption dataset to Tableau.
- Imported the data from the database and verified the fields and data types.

2. Data Preparation

- Cleaned the dataset by removing missing and duplicate values.
- Formatted columns and prepared the data for analysis.

3. Data Visualization

- Created various charts and graphs to analyze electricity consumption patterns.
- Used line charts, bar charts, and maps to identify trends and regional variations.

4. Dashboard

- Combined multiple worksheets into interactive dashboards.
- Added filters, legends, and titles to provide a clear view of electricity usage insights.

5. Story

- Developed Tableau stories to present the analysis in a logical sequence.
- Highlighted important findings and consumption trends.

6. Performance Testing

- Tested the dashboard and worksheets for accuracy and responsiveness.
- Ensured that filters and visualizations worked correctly and loaded efficiently.

7. Web Integration

- Published the dashboards and stories to Tableau Public or Tableau Server.
- Generated web links and embedded the visualizations into web pages for easy access.

8. Project Demonstration & Documentation

- Demonstrated the complete project workflow and dashboard functionalities.
- Prepared the project report and documentation, including objectives, methodology, analysis, and conclusions.
