5.3 – Project Progress Tracking

Project progress was effectively monitored and managed using ZohoCliq, which served as the primary communication and collaboration platform among team members and mentors. Regular updates regarding task completion, deadlines, and project milestones were shared through ZohoCliq channels to ensure smooth coordination throughout the development process.

The platform facilitated real-time discussions, file sharing, and issue resolution, enabling the team to efficiently track the progress of activities such as data collection, data preparation, dashboard creation, story development, web integration, and documentation. Team members used ZohoCliq to assign responsibilities, share feedback, and maintain transparency in the workflow.

Additionally, ZohoCliq helped in organizing meetings, communicating with SmartBridge mentors, and ensuring timely completion of project deliverables. Through continuous monitoring and collaboration, the team was able to successfully manage the project schedule and achieve the objectives of "Plugging into the Future: An Exploration of Electricity Consumption Patterns" within the planned timeline.
